EDUCATION

National University Manila

Aug 2022 - Present

Bachelor of Science in Information Technology

- Specialization in Mobile and Web Application.
- 3.71 CGWA - Consistent Dean's Lister.
- University Academic Excellence Benefit Scholar - 100% discount on tuition and misc fees.
- Capstone Project titled "Maize Watch: Corn Monitoring System Using IoT Sensors with Prescriptive Analytics".

Marikina Science High School

2020 - 2022

Senior High School (STEM)

- Graduate with High Honors.

SKILLS

- UI/UX Design
- Front End Coding
- Back End Coding
- Server Management
- Wireframe Creation
- Database Management
- Problem-Solving
- Communication and Collaboration

TECHNICAL SKILLS

Front-End Development

- **Languages:** HTML, CSS, JavaScript, Dart
- **Frameworks:** React, Tailwind CSS, Bootstrap, Flutter Development, Vue

Back-End Development

- **Languages:** JavaScript, TypeScript, Python, PHP
- **Frameworks:** Express.js, Laravel

Databases

- **SQL:** MySQL, MS SQL
- **NoSQL:** Firebase, MongoDB

Tools and Platforms

- **Version Control:** Git, Github
- **Development Tools:** VS Code, Android Studio, Eclipse

PROJECTS

Maize Watch | Mobile and Web Application

2025

- Maize Watch is an IoT-powered system that helps corn farmers optimize yield and make data-driven decisions through real-time monitoring and machine learning insights. It collects sensor data and provides prescriptive analytics. Built with Flutter, React, Node.js, and MongoDB, it delivers a unified smart farming platform.

Refurnish | Next.js | MERN Stack

2025

- A furniture marketplace platform for buying and selling of furniture. The web app uses Next.js, React, TypeScript, and TailwindCSS for a fast, responsive, and scalable frontend. Its Node.js and Express backend integrates MongoDB, Redis, and Socket.io, with Docker, PNPM, and JWT ensuring efficient deployment and secure authentication.

Cycling Ride Generator | Flutter, MongoDB

2025

- A Flutter application that generates personalized bike ride routes for users and displays curated cycling-related articles to enhance their riding experience.

Facebook Replication | Flutter

2025

- A replication of Facebook mobile user interface using Flutter.

Zambales Tour | HTML, CSS

2024

- An informative web page for tourists who are interested to visit Zambales.

Sinagtala | HTML, CSS, JavaScript

2023

- An event management website that offers planning and execution services, developed using HTML, CSS, and JavaScript.

Touch My Deck | Android Studio, Firebase

2022

- A sorting game where the users organize the cards systematically based on a specific criteria. The application is developed using android studio.
