PROFESSIONAL SUMMARY

Detail-oriented Software Engineer and Magna Cum Laude graduate with a strong foundation in full-stack engineering and proven experience building end-to-end web and mobile products using the MERN stack. Skilled across the full lifecycle—from crafting intuitive UI/UX to architecting secure backend services, optimizing relational and NoSQL databases, and automating CI/CD pipelines. A proactive problem-solver with a defensive security mindset, eager to contribute technical precision and engineering dedication to a high-impact team.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, C#, Python, Dart, HTML/CSS
Frameworks & Libraries: React, Vue.js, ASP.NET Core, Express.js, Laravel, Inertia.js, Axios, Tailwind CSS, Vuetify, Bootstrap, Flutter, jsPDF
Databases & ORMs: PostgreSQL, MySQL, MS SQL, MongoDB, Firebase, Eloquent ORM, Database Migrations
Testing & Security: Playwright, OWASP ZAP, xUnit
Tools, AI & Platforms: Docker, Ollama, Git, GitHub, VS Code, Android Studio, Eclipse, Codeviz

WORK EXPERIENCE

Elinnov Technologies - Software Engineer Intern **March 2026 - May 2026**

- **Backend Engineering (.NET)**: Developed and refactored RESTful services and database validation logic using C# / .NET, optimizing data integrity and backend reliability.
- **Application Security**: Conducted vulnerability assessments using OWASP ZAP, remediating critical security flaws including path traversal, XSS, and clickjacking.
- **Testing & DevOps**: Built end-to-end automated testing suites with Playwright and resolved GitHub Actions CI/CD blockers using optimized multi-stage Docker configurations.

Authentic Caps Philippines - Web Development Intern **December 2025 - February 2026**

- **Full-Stack & API Engineering:** Migrated legacy platforms to the Laravel MVC framework and integrated custom RESTful APIs.
- **Database & UI Planning:** Designed relational schema blueprints, built complex ERD architectures , and engineered modular Vuetify layout workflows.
- **Local AI Integration:** Self-hosted and interfaced offline large language models using Ollama and researched vector database RAG frameworks.

PROJECTS

Maize Watch | Mobile and Web Application (Capstone Project) **2025**

- Maize Watch is an IoT-powered system that helps corn farmers optimize yield and make data-driven decisions through real-time monitoring and machine learning insights. It collects sensor data and provides prescriptive analytics. Built with Flutter, React, Node.js, and MongoDB, it delivers a unified smart farming platform.

Refurnish | Next.js | MERN Stack **2025**

- A furniture marketplace platform for buying and selling of furniture. The web app uses Next.js, React, TypeScript, and TailwindCSS for a fast, responsive, and scalable frontend. Its Node.js and Express backend integrates MongoDB, Redis, and Socket.io, with Docker, PNPM, and JWT ensuring efficient deployment and secure authentication.

Sinagtala | HTML, CSS, JavaScript **2023**

- An event management website that offers planning and execution services, developed using HTML, CSS, and JavaScript.

EDUCATION

National University Manila - Bachelor of Science in Information Technology **Aug 2022 - Sept 2026**

- Specialization in Mobile and Web Application.
- Magna Cum Laude, 3.72 CGWA - Consistent First Honor Dean's Lister.
- University Academic Excellence Benefit Scholar - 100% discount on tuition and misc fees.

Marikina Science High School - Senior High School (STEM) **2020 - 2022**

- Graduate with High Honors.
